 - Long-term forecast
- Model demonstration

Model

Regional Economic Models, Inc. (REMI) was founded in 1980 on a transformative idea: *government decision-makers should test the economic effects of their policies before they're implemented.* We are the nation's leader in dynamic local, state and national policy modeling. Our clients use REMI models to perform rigorous economic analysis that critically influences local, state and national policies.

OUR CLIENTS:

Business Roundtable • Sandia National Laboratories • Ernst & Young • Texas Comptroller
University of Michigan • Tennessee Valley Authority • National Education Association
South Coast Air Quality Management District • Florida Legislature
North Carolina Department of Commerce • Wyoming Department of Administration & Information
California Environmental Protection Agency • U.S. Army Corps of Engineers

Oregon State Economy

- Oregon is the 39th most populous and the 9th most expansive of the 50 United States.¹
- Population of 4.19 million; median age of 39.6; and a median household income of \$63,426.²
- Largest contributors to GSP by sector include real estate, rental and leasing, manufacturing, health care and social assistance, and professional, scientific, and technical services.³
- Oregon's vast forests are a leading source for lumber in the U.S. harvesting more timber than any other state.
